ABOUT ME

I am a highly motivated and goal-oriented student with proven organizational and communication skills who can take on any task and adjust to changing circumstances with a resourceful and hard-working attitude. My professionalism and precision have been demonstrated in a variety of assignments and group projects throughout my undergraduate courses and activities.

- Documenting
- Team Working
- Problem Solving

- **MediClinic-Software Application(2021)**

This is the second year java based group project in my degree. MEDICLINIC is an mobile application that created to both patients and doctors to work with ease , so that doctors and patients can share their health issues. Using this app patients and doctors can join clinics , add notes and notices. Doctors and patients can experience the MEDICLINIC application without trouble.

- **Shop & Drop-Website(2021)**

This is one of the projects I completed as a part of my degree program. The website shop & drop was established to help business owners manage their inventory. They can manage stock levels, delivery items, and so on. OOP and the Java programming language

concepts that were used to develop this Website. Eclipse was used as an IDE, and MYSQL was used as a database.

- **Techscope Electronic Device Service Center**

Techscope Electronic is a company that repairs electronics such as air conditioners and computers. It employs a broad workforce that includes engineers, managers, accountants, and cleaners. To manage employee profiles, client profiles, appointment scheduling, and repair management, the organization employs a system. The system's purpose is to provide clients with quick and easy access. I had successfully completed my contribution to the development of the entire UI/UX and Repair management. I also carried out all CRUD operations. (Java, MySQL, and Bootstrap 4)
